### About Me

Strong in design and integration with intuitive problem-solving skills. Proficient in Java, JavaScript, and SQL. Passionate about implementing and launching new projects. Ability to translate business requirements into technical solutions along with excellent teamwork, interpersonal and communication skills. Looking to start my career as an entry-level software engineer.

### Work History

#### Junior Software Developer

Prospecta Software Private limited, sector 48, Gurugram, Haryana | FEB 2023 - Present

- Coordinate with the software engineering team to develop SAP solution based application, including performing debugging activities and providing recommendations to improve user functionality
- worked on JWT token based login and logout functionality with including saml login feature
- Developed AWS multipart upload and download with file compression through async process

**Key Achievement:** Executed end-to-end application flows with a keen understanding, contributing to critical features delivery with near-zero bug records.

### Projects

#### Venture Trip Application 🔄

Venture trip is a trip management application where different kinds of web service APIs are available.

##### Features:

- Login and signup module
- Different kinds of CRUD-related functionalities from the admin and user side
- Booking new trip tickets according to the package

**Tech-Stack:** Java, SQL, Spring Boot and Hibernate

##### Areas of Responsibility:-

- Developed Entity relationship between tables.
- Integrated the admin side functionalities

This project was executed in 4 days and was collaboratively built by 4 developers

### Certifications

Course on Computer Concepts(NIELIT) Aug 2019
